

SEPTEMBER 2025 QUARTERLY ACTIVITIES REPORT

Saturn delivers another standout quarter with the Apollo Hill Mineral Resource upgraded to 2.24Moz¹, with 82% now in Measured and Indicated, and numerous strong drill intersections.

The flow of strong drill results, together with continued resource growth under a large-scale, low-cost bulk tonnage mining and heap leach processing scenario, is integral to the impending Pre-Feasibility Study (PFS) and maiden Ore Reserve – scheduled for Q4 2025.

HIGHLIGHTS

Apollo Hill Gold Project Development

Apollo Hill Resource Increases to 2.24Moz Au; 82% Classified as Measured & Indicated

The second consecutive Mineral Resource upgrade for the year was announced, increasing to <u>137.1Mt</u> @ <u>0.51g/t Au for 2,239,000 oz</u>¹, reported above a cut-off grade of 0.20g/t Au and within a constraining pit shell (Figure 1) developed using a A\$3,550/oz (US\$2,300/oz) gold price together with low-cost bulk tonnage mining and heap leach processing.

Significant Resource Development Drilling Results

- Results returned at the southern end of Apollo Hill highlighted zones of structurally focused, thick and high-grade gold mineralisation at the Iris and Tefnut prospects. The intercepts highlighted additional prospectivity over an extensive footwall structure to the greater Apollo Hill gold system. Significant intersections returned include:
 - 11m @ 6.29g/t Au from 69m within 38m @ 2.18g/t Au from 48m AHRC1199
 - 10m @ 6.11g/t Au from 73m within 20m @ 3.60g/t Au from 64m AHRC1270
 - 10m @ 3.69g/t Au from 37m within 31m @ 1.07g/t Au from 37m AHRC1200
 - 8m @ 4.94g/t Au from 156m within 12m @ 3.40g/t Au from 156m AHRC1219
 - 8m @ 4.85g/t Au from 54m within 22m @ 2.19g/t Au from 52m AHRC1272
 - 9m @ 4.50g/t Au from 93m AHRC1217
 - 7m @ 4.48g/t Au from 51m within 18m @ 2.14g/t Au from 48m AHRC1226
 - 7m @ 4.15g/t Au from 119m within 14m @ 2.65g/t Au from 112m- AHRC1213
 - 9m @ 3.75g/t Au from 51m within 21m @ 1.75g/t Au from 43m AHRC1271
 - 8m @ 3.37g/t Au from 88m within 32m @ 1.01g/t Au from 64m AHRC1211
 - 18m @ 2.49g/t Au from 113m AHRC1234
 - 14m @ 2.11g/t Au from 45m AND 13m @ 2.19g/t Au from 65m within 41m @ 1.46g/t Au from 44m

 AHRC1310

Corporate

Funds

The cash position of the Company at the end of the quarter was \$22.08 million.

Successful Capital Raising Completed

• On 2 October (subsequent to quarter-end), the Company announced that it had received firm commitments to raise \$45.0 million (before) through an exceptionally well supported share placement to institutional and sophisticated investors at a price of \$0.58 per share. The settlement of the placement will result in the issue of 77,586,207 new shares.

Management Comment

Commenting on an exceptional quarter for the Company, Saturn Managing Director Ian Bamborough said:

"The latest Mineral Resource update represents the seventh consecutive upgrade for the Company at our flagship Apollo Hill Gold Project in as many years. We continue to take significant steps forward with the Resource under a conventional, efficient, bulk mining and heap leach processing trajectory. Significant improvements in both the quality and size of the Mineral Resource through effective drilling continue to bode well for the advancement of our business.

"Impressive conversion to the higher confidence Measured and Indicated Mineral Resource Categories provides an expanded basis to underpin the Company's Pre-Feasibility Study and inaugural Ore Reserve, scheduled for release later in CY2025.

"Meanwhile, the impressive sequence of assay results reported during the quarter confirms our belief that coherent high-grade zones like Iris have the potential to repeat throughout the greater Apollo Hill gold system. This, together with the geological learnings we have gained from our recent drilling, gives us confidence to continue exploring Apollo Hill for new discovery and growth opportunities.

"Drilling will target more of these recently identified structures in the coming months. Ultimately, this drilling will contribute towards our next Mineral Resource update, planned for release in the first half of 2026. We look forward to reporting additional rounds of assays as our drill programs advance."

Saturn Metals Limited (ASX: STN) ("Saturn", "the Company") is pleased to provide its Quarterly Activities Report for the period ended 30 September 2025.

ACTIVITIES

Apollo Hill Gold Project Development

The Company continues to progress towards the development of a large-scale, long-life and financially robust gold mining operation at the 2.24 million ounce¹ Apollo Hill Gold Project ("Project") in Western Australia through continuing studies and test work.

Mineral Resource Upgrade

The upgraded Mineral Resource (Figure 1 & Figure 2) reported during the quarter – totalling **137.1Mt at 0.51g/t Au for 2,239,000oz**¹ – represents a 10% or 200koz increase in contained gold ounces from the previous resource published in February this year.

Importantly, a significant portion of the Apollo Hill Mineral Resource across the shallower levels of the deposit–107.4Mt @ 0.51g/t Au for 1,753koz– has now been classified as Indicated Mineral Resource.

In addition, a portion of the resource at surface -4.8Mt @ 0.54g/t Au for 83koz - is classified as Measured Mineral Resource (and is based on three discrete areas where RC grade control drilling has been used to test the models.

Measured and Indicated material now accounts for a combined 82% of the total Mineral Resource.

The near-surface location of these high confidence resource categories provides an excellent basis for the current Pre-Feasibility Study.

The updated Mineral Resource incorporates the assay results from a highly successful 55,757m extensional and in-fill drilling program comprising 300 Reverse Circulation (RC) and nine diamond holes completed within the model area after the last Mineral Resource upgrade.

Cost and recovery parameters as used in Saturn's Preliminary Economic Assessment (PEA), (published to the ASX on 17 August 2023) and Saturn's ASX Announcement on Metallurgy (published on 5 June 2025) act as a guide to reasonable prospects for eventual economic extraction (RPEEE).

Please see Appendix 1 for the Apollo Hill Mineral Resource table.

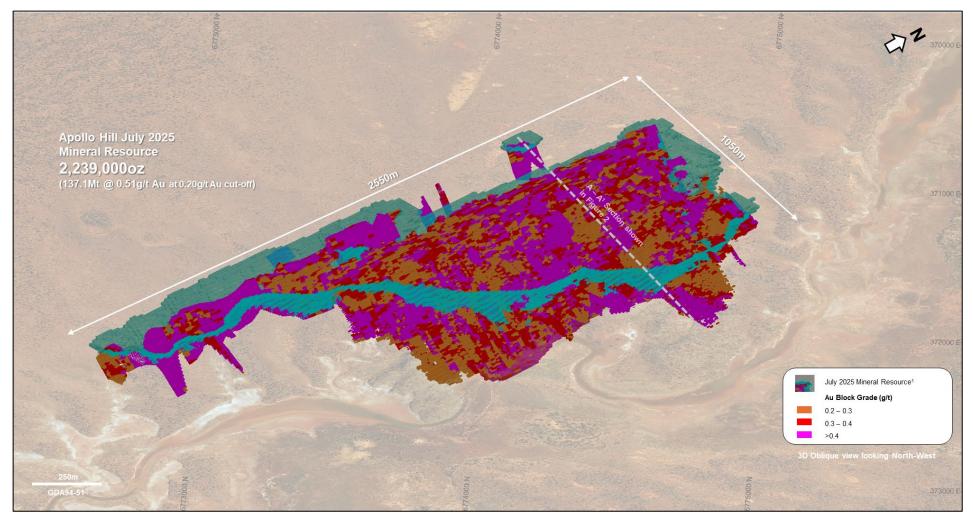

Figure 1 – Oblique view 3D representation of the July 2025 Apollo Hill Mineral Resource model and selected nominal constraining pit for reporting shown with topography – Mineral Resource reported within/above the pit shell only.

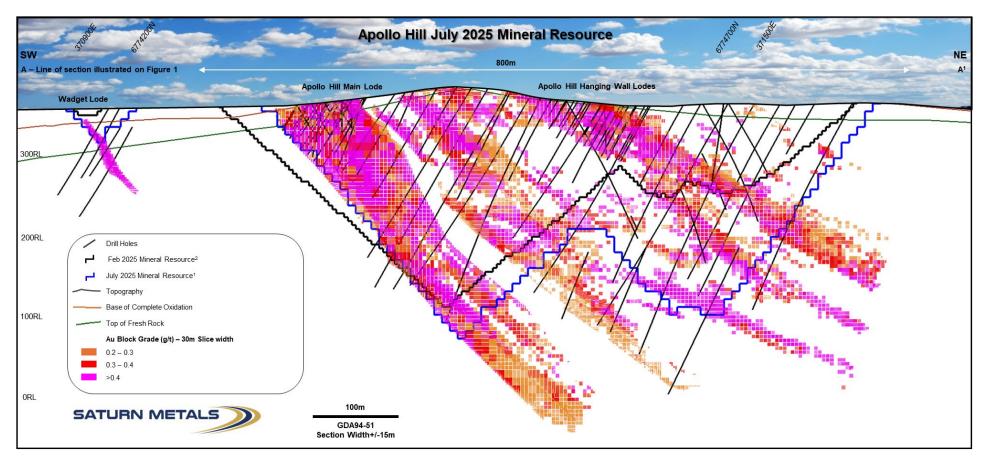

Figure 2 – Oblique block model cross-section (South West – North East, A-A¹ on Figure 1 3D diagram) ± 15 m showing gold grade and block location.

Resource Development Drilling Activities

During the quarter, RC resource development drilling at the southern end of Apollo Hill delineated a new zone of structurally focused, thick and high-grade gold mineralisation, which has been named the 'Iris Zone'.

Intercepts in this area highlighted additional prospectivity over an extensive structure in the footwall of the greater Apollo Hill gold system. The new results are clustered over an initial strike length of 350m, with the mineralisation remaining open both down-plunge and along strike.

Significant intersections are summarised in the highlights section of this report. During the quarter, results were reported from 98 Reverse Circulation (RC) drill-holes for 13,980m. Reported drill-hole locations and significant results are illustrated in plan view in Figure 4.

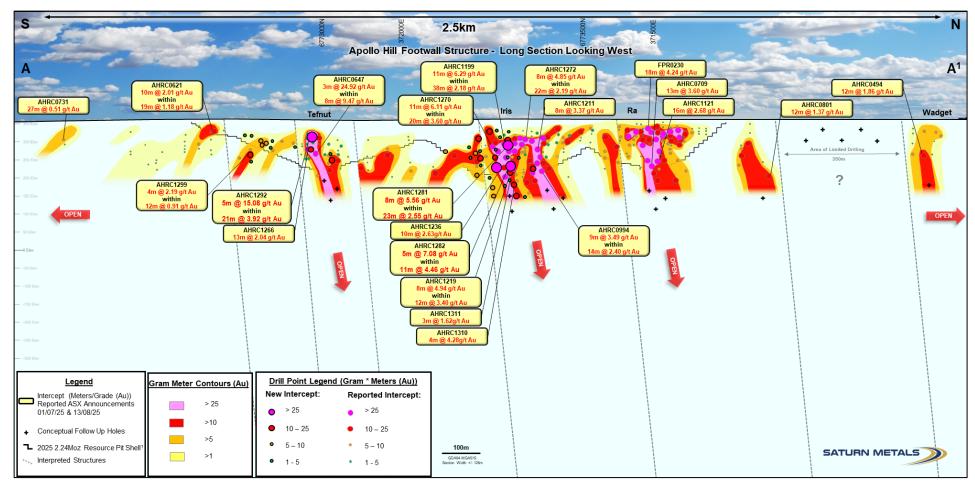

Figure 3 – Long Section of the Apollo Hill Footwall Structure, looking west, illustrating the Iris, Ra, Tefnut and Wadget lodes. Location of 2.5km long section (A-A¹) illustrated on plan overview diagram (Figure 4). Drill hole Gram Metre (g/t Au x Metres) points are sized in accordance with their grade; larger point size equals higher Gram Metre grade.

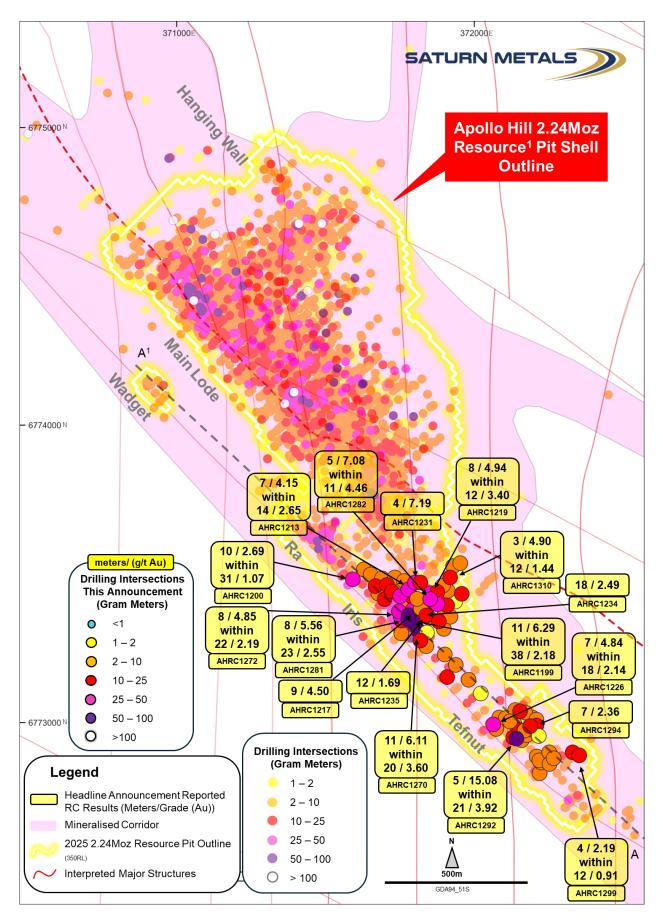

Figure 4 – Plan Overview, Apollo Hill RC Holes. Previously reported holes >1 Gram Metre with all holes reported in this announcement (ASX Announcement 01/07/25 & 13/08/25) illustrated. July 2025 2.24Moz Apollo Hill Mineral Resource¹ Pit Shell Outline seen at 350RL (Average Surface RL); Figure 3 Long Section illustrated as line A-A¹ on this diagram. Figure 3 Cross-Section illustrated as line B-B¹ on this diagram.

Other Project Development Updates

Ongoing Metallurgical Column Leach Test Work

A total of 21 variability columns continued during the quarter, with the aim of further expanding the leach test work database across Apollo Hill's geography and geology for gold recovery. The columns focused on Apollo Hill's fresh rock materials, which make up the vast majority of the Resource (93%). Fifteen of these columns were focused on assessing leachability at the Project's selected 8mm P₁₀₀ crush size. The other six columns assessed the leachability of fresh material at coarser crush sizes (>8mm P₁₀₀) as investigation into the potential to reduce costs (less energy use) as part of ongoing feasibility optimisation studies.

Environmental Studies

A surface hydrology impact study continued during the quarter considering, amongst other things, the ecology of the nearby Lake Raeside environment – with results anticipated during the coming quarter. Compilation of results from the Flora, Fauna and Short-Range Endemic environmental surveys undertaken in the previous quarter continued, with only preliminary results being received to date. No items of concern were raised from these preliminary results, and the finalisation of these surveys will be used to inform the PFS and future permitting submissions.

Engineering Studies

The Company has continued to work with Kappes Cassiday & Associates (KCA) during the quarter, undertaking detailed process engineering work components of the PFS. These workstreams, along with other key Civil and Mining Engineering studies progressed positively during the quarter. KCA has responsibility for consolidating all technical elements of the PFS.

Early-Stage Permitting Considerations

During the quarter, permit applications remained in progress with the relevant regulatory authorities for a potential phased approach (Stage 1) to operations at Apollo Hill, including Mining Proposal, Works Approval and Native Vegetation and Clearing Permit.

PLANNED WORK NEXT QUARTER

Planned work during the December 2025 Quarter includes:

Development – Apollo Hill:

- Continuation of exploration and resource development RC drill program. Drilling is continuing towards developing a further Mineral Resource update which will provide the basis for a DFS mining inventory and production forecast and updated Ore Reserve, targeted for release in CY2026.
- · Geotechnical and metallurgical focused diamond drilling.
- Sterilisation AC drill programs (and RC, if required).
- Water bore development program.
- Ongoing metallurgical test work as described in the Project Development section of this report.
- Continuation of environmental surveys (focusing on the ongoing monitoring of bores and flora and fauna background work).
- Continuation of a surface hydrology impact study.
- Ongoing work with Kappes Cassiday & Associates (KCA) for the detailed process engineering work components of the PFS.

- Alternative mining and processing trade-off/check investigation work as part of ongoing feasibility studies and Project refinement.
- Mining engineering work towards the Pre-Feasibility Study.

Exploration:

• The Company is planning further AC and RC drilling campaigns across various greenfields and brownfields exploration targets in its portfolio.

FINANCE, CORPORATE AND GOVERANCE

The cash position of the Company on 30 September 2025 was \$22.08 million.

Post quarter end, firm commitments were received to raise \$45 million (before costs) through a share placement to institutional and sophisticated investors, with proceeds to be received in the December 2025 quarter.

The Appendix 5B² is appended to this announcement.

TENEMENTS - LAND POSITION

The Company's tenement holdings are illustrated in Figures 5 and 6. A complete list of the Company's tenement holdings (30 September 2025) is included at Appendix 2.

In Western Australia, Saturn currently holds 1,899.33km² of contiguous live tenements, with granted tenure including:

- 2 Mining Leases for 4.35 km²;
- 16 Exploration Licences for 593.5 km²; and
- 55 Miscellaneous Licences totalling 918.39 km².

Saturn's pending Western Australian applications comprise of 370.97 km² of tenure including:

- 1 Mining Lease for 121.72 km²;
- 8 Exploration Licences for 235.90 km²; and
- 11 Miscellaneous Licences totalling 13.35 km².

In addition, the Company also holds one exploration licence which covers 153.7 km² in New South Wales, in ground adjacent to the Company's West Wyalong Joint Venture (Figure 8).

During the quarter, the following changes to the Company's tenement holdings occurred:

- New tenement applications were lodged for E31/1441 & E31/1443 at Apollo Hill.
- Tenement application L40/45 was granted on 8 July 2025.

² Included in the Appendix 5B section 6 are amounts paid to the Directors of the Company during the quarter totalling \$189,208 comprising \$173,688 of normal Director and Managing Director fees and \$15,520 of associated superannuation.

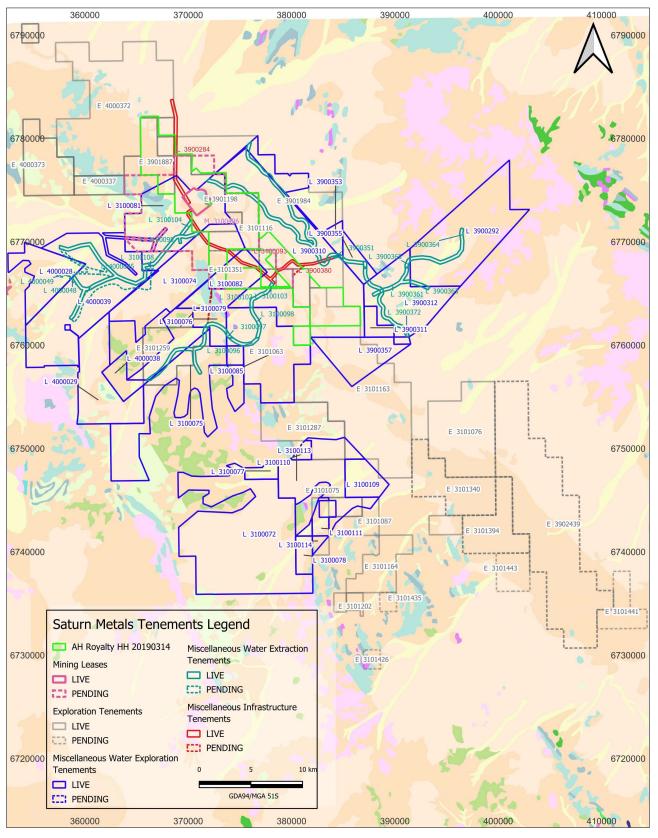

Figure 5: Saturn Metals Limited WA (Apollo Hill) tenement map and land holdings – 30 September 2025 (base map GSWA 1:250k regolith map sheet); diagram also shows the extent of the Hampton Hill Royalty.

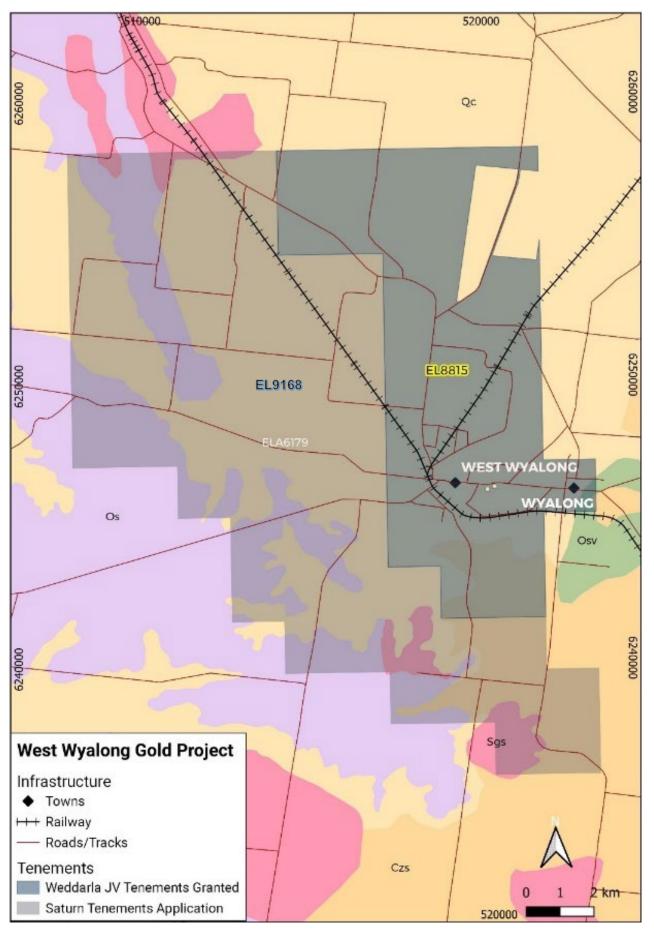

Figure 6: Saturn Metals Limited NSW (West Wyalong) tenement map, land holdings and interests – 30 September 2025 (base map GSNSW 1:250k regolith map sheet).

This Announcement has been approved for release by the Board of Directors of Saturn Metals Limited.

Note:

^{*}Land subject to 5% Hampton Hill Royalty on gold production from these tenements in excess of 1 Moz production – see Figure 5.

** Saturn Metals Limited holds a 60% interest in this tenement through a farm in Joint Venture arrangement.

^{***} This tenement overlaps other Saturn Metals tenure and so this area is not included in the total area calculation.

Current Tenement Holdings Schedule – 30 September 2025 (Cont'd)

Apollo Hill (29.15°S and 121.68°E) is located approximately 60km south-east of Leonora in the heart of WA's goldfields region (Figure 7). The deposit and the Apollo Hill project are 100 % owned by Saturn Metals and are surrounded by good infrastructure and several significant gold deposits.

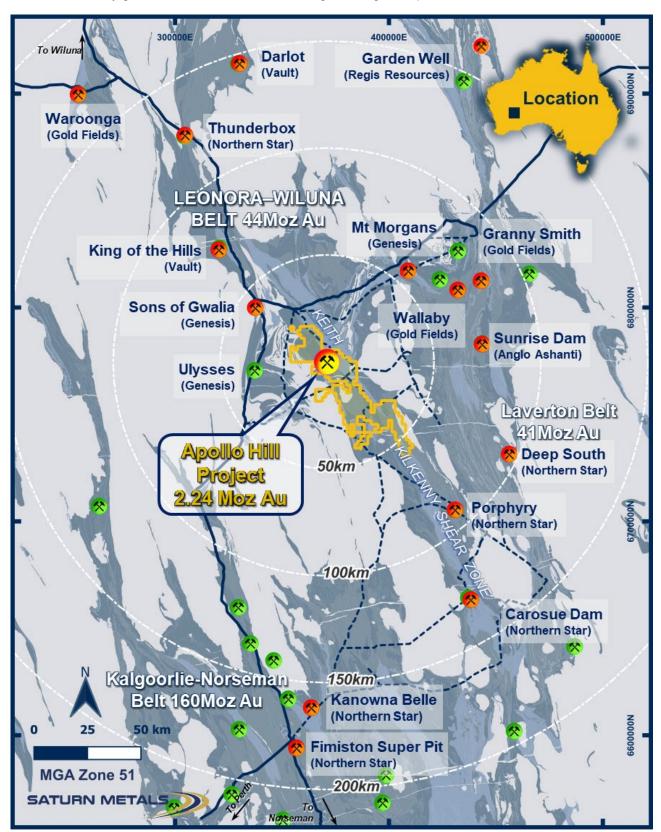

Figure 7: Apollo Hill location, Saturn Metals' exploration and mining tenements and surrounding gold deposits, gold endowment and infrastructure.

Current Tenement Holdings Schedule – 30 September 2025 (Cont'd)

In addition, Saturn Metals has a second quality gold exploration project in Australia. The Company has an option to earn an 85% joint venture interest in the West Wyalong Project (Figure 8), which represents a high-grade vein opportunity on the highly gold prospective Gilmore suture within the famous Lachlan Fold belt of NSW.

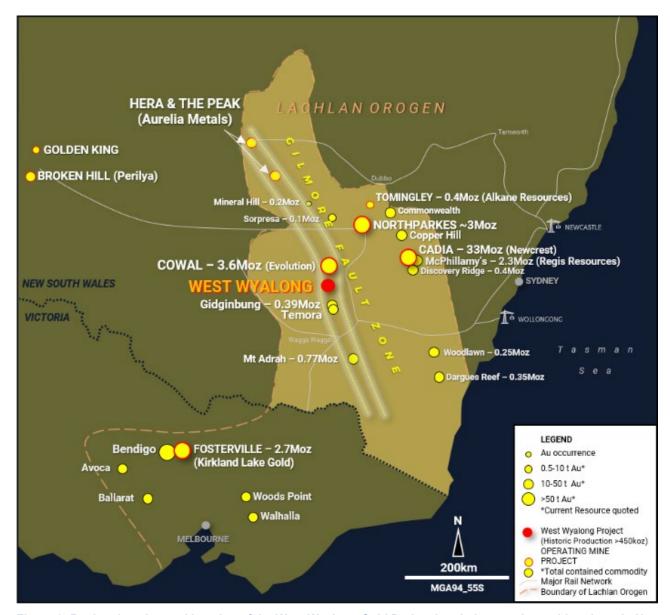

Figure 8: Regional setting and location of the West Wyalong Gold Project in relation to other gold projects in New South Wales and Victoria (c)map adapted from New South Wales Government publication, October 2019; various company websites accessed 17 April 2020 and Fuller and Hann 2019). The West Wyalong Gold Project represents a high-grade vein opportunity on the highly gold prospective Gilmore suture within the famous Lachlan Fold belt of NSW.

8.4	Cash and cash equivalents at quarter end (item 4.6) 22,08		22,080
8.5	Unused finance facilities available at quarter end (item 7.5)		
8.6	Total available funding (item 8.4 + item 8.5) 22,0		22,080
8.7	Estima item 8	ated quarters of funding available (item 8.6 divided by .3)	4.43
	Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:		
	8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?		
	8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?		
	8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?		
	Note: wi	here item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 abo	ove must be answered.

Compliance statement

- This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 8 October 2025

Authorised by: By the Board of Directors

Notes

- This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
